CALL FOR APPLICATIONS - BENEFICIARIES AND SUPPORT SCOPE

Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor the granting authority can be held responsible for them.

DECARBONIZE YOUR DH SITE FOR FREE

Low2HighDH is a project financed by EU Commission with the ambitious goal of transforming 30 high-temperature district heating sites in **Lithuania, Poland, and Slovakia** by integrating green technologies.

If you **own or manage a DH site**, consuming high amounts of coal or gas and you want to implement green technologies, this is an opportunity for you. **APPLY NOW to receive support.**

To achieve this, we are inviting district heating sites in these countries to participate through our Call for Applications.

Successful applicants will receive free expert guidance and tailored solutions to enhance their energy efficiency and transition towards a more sustainable future.

WHY TO APPLY?

- **Is your district heating site based in Lithuania, Poland, or Slovakia?**
- **Are you seeking expert advice to decarbonize your heating systems at no cost?**
- **Do you want a customized technical solutions plan including green technologies tailored to your site's needs?**
- **Would you benefit from a detailed investment plan to ensure the financial viability of your project?**
- **Are you interested in collaborating with a European Commission-funded LIFE project to connect with financial institutions and subsidies to secure funding?**

If you answered **"YES"** to any of these questions, the **Low2HighDH project is here to help you** achieve your sustainability goals **free of charge**, thanks to EU Commission funding.

Submit your case - contact@low2highdh.eu.

WHAT WE OFFER

By participating in Low2HighDH, your district heating site will receive:

TECHNICAL SOLUTIONS

Comprehensive Technical Plan: Tailored recommendations for integrating low-grade and waste heat technologies into your existing systems.

FINANCIAL SOLUTIONS

Exhaustive Financial Planning: Calculation of the required capital and operational expenditures, potential revenue, and tax structure for the technologies to be implemented, along with the selection of the most appropriate sources of funding for your project.

INVESTMENT PLAN INITIATION

Investment Strategy: Assistance in defining a clear path and initiating the work plan to engage funders and secure financing for the technical components of your project.
